## **BONEHAM'S STATEMENT OF QUALITY**

Boneham Metal Products, Inc. is committed to supplying Drill Bushings that meet or exceed the tolerance specifications established by our Customer, the American National Standards Institute (ANSI), and the International Standards Organization (ISO).

We subscribe to the philosophies of maintaining superior levels of product quality through the techniques of Statistical Process Control, frequent quality audits of our operations, strict inspections of all incoming materials, and constant analyses of methods to improve our level of service.

Our Drill Bushings are manufactured to the material, functional, and dimensional parameters dictated by the operational requirements put forth by our customer. We strive to provide Drill Bushings that will maintain a service that life consistent with their intended use, and we are always working to deliver our products in the most expeditious time frame possible.

We solicit and welcome any recommendations which will enable us to provide a continuous level of improved service.

---

## STANDARD BUSHINGS

All of the bushings listed within this catalog are Boneham's range of standard sizes. The first section of this catalog contains our standard range of ANSI/Boneham style bushings whose tolerances conform with the guidelines established by the American National Standards Institute (ANSI). Our range of standard bushing bores are those standard letter, number, and fractional sizes, in both drill and reamer tolerances, as defined by ANSI. For this range of bushings, selected millimeter bores from 2.3mm to 10.5mm, as designated by a box on the back cover, are also available as STANDARD. Any bore size not indicated as standard on the back cover is considered to be special. Our Sales Service Representatives will be glad to supply you with appropriate pricing for all specials.

The second section of this catalog offers our new range of "Total Metric" bushings. These dimensions and tolerances conform with the guidelines established by the International Standards Organization (ISO). Please refer to pages 17 and 18 for ordering and technical information pertaining to these bushings.

## SPECIAL BUSHINGS

When required dimensions vary from the standard catalog listings of ID., O.D., Length, or Tolerance, the bushings are considered to be "specials". Many specials can be made from standard cataloged items by minor alterations. Others can be manufactured from standard bushing blanks. Some items are so completely different they must be custom made. Boneham is ready to manufacture all specials required - from the minor alteration to the complete "from scratch" special. Please forward your specifications, whether verbal, by sketch, or blueprint, along with your material requirements to our Sales Service Representatives for expeditious review and quotation.

As always, please use our **TOLL FREE TELEPHONE** or FAX numbers:

800 Telephone: 1-800-631-7852

800 Fax: 1-800-526-9494

## OVERSIZED BUSHINGS

All ANSI/Boneham Press Fit and Liner type bushings in the first section of this catalog are available with oversize (unground) O.D.'s. When ordering, use the same ANSI symbol system as for Finish Ground bushings and add a "U" at the end of the bushing length designation. Please note that all bushings will be considered to be Finish Ground unless specifically designated as Oversize or Unground.

### For Example:

An Oversize Headless Liner with a 1" ID., a 1-3/8" O.D., and a 2-1/8" length would be described as L-88-34U. No drill size is required since liners have one standard bore size for a specific O.D. Also the "drill or reamer" specifications are not required due to the fact that renewable bushings are inserted into liners.

The following chart details the O.D. tolerances for oversize bushings:

Nom. O.D.	O/S Tol.	Nom. O.D.	O/S Tol.	Nom. O.D.	O/S Tol.
5/32	.166 .161	1/2	.520 .515	1-3/8	1.395 1.390
3/16	.198 .193	9/16	.582 .577	1-1/2	1.520 1.515
13/64	.213 .208	5/8	.645 .640	1-5/8	1.645 1.640
1/4	.260 .255	3/4	.770 .765	1-3/4	1.770 1.765
5/16	.327 .322	7/8	.895 .890	1-7/8	1.895 1.890
3/8	.393 .388	1	1.020 1.015	2-1/4	2.270 2.265
13/32	.421 .416	1-1/8	1.145 1.140	2-3/4	2.770 2.765
7/16	.455 .450	1-1/4	1.270 1.265		

## GUARANTEE

Boneham Metal Products, Inc. Drill Bushings are guaranteed against defects in materials or workmanship. The tolerances of our products are guaranteed to conform to either ANSI, ISO, or catalog standards.

# Ordering Information

## ANSI/BMP BUSHINGS

For ordering information on ISO style Total Metric Bushings, please see page 19.

For ANSI/Boneham style bushings:

Please supply the following information:

- Bushing **TYPE**
- **OUTSIDE DIAMETER**
- Bushing **LENGTH**
- **INSIDE DIAMETER**
- Whether for a **DRILL** or **REAMER**

The bushings in this section of the catalog are defined by the ANSI Symbol System. This system is applied as follows:

### Example Number 1:

A Headless Press Fit bushing with a 1/2" OD., a length of 3/4", a 1/4" bore, and to be used for drilling, would be described as:

\*This is overall for headless press fit and all liner bushings and the "under-head" length for all head type press fit and renewable bushings.

### Example Number 2:

A Slip-Fixed Renewable bushing with a 7/16" OD., a length of 1/2", a bore of 3mm, and to be used for Reaming, would be described as:

SF-TW-28-8, 3mm, REAMER

### BUSHING TYPE DESTINATION

Bushing Type	ANSI/BMP Letter Designation	Thinwall Letter Designation
Headless Press Fit	P	P-TW
Head Press Fit	H	H-TW
Slip Fixed Renewable	SF	SF-TW
Headless Liner	L	L-TW
Head Type Liner	HL	-

### PAYMENT TERMS

1% ten days, net 30. (Please note that invoices not paid within 60 days may be Subject to a 1-1/2% per month service charge).

### SHIPPING

All prices quoted will be FOB. KENILWORTH, New Jersey.

### RETURNS

When requesting authorization for a return please supply your purchase order number and Boneham's invoice number

Standard products returned up to 2 weeks from the invoice date will be subject to a 15% re-stocking charge.

Standard products returned over 2 weeks and up to 6 weeks from the invoice date will be subject to a 20% re-stocking charge.

Beyond 6 weeks after the invoice date, the return must be negotiated and will be subject to additional restocking charges. No return will be allowed if inventory conditions do not warrant such a return.

Returns must be shipped **prepaid**.

Special products are not returnable.

Any products returned because of errors made by Boneham will not be subject to restocking charges and replacements made because of Boneham errors will have all freight charges paid by Boneham.

Any items that are returned without prior approval will be returned at the sender's expense.

### PRICES

ANSI/Boneham style bushings have the ANSI bushing symbol and Boneham price code in each identification box located in the charts on the following pages.

Please see separate price list for Boneham Standard Bushing Steel" bushings.

Boneham NITRALLOY Nitrided drill bushings will be quoted upon request.

Page 17 contains all information on prices for ISO/Boneham drill bushings.

Please note that all prices may be subject to change without notice.

### BONEHAM BUSHING MATERIALS

1. Standard Boneham Drill Bushings (over .0400" bore) are manufactured from steel which demonstrates excellent wear resistance and dimensional stability characteristics. This material is "hardened" to Rc 62-64.
2. All Boneham Drill Bushings (.0625k bore and over), are offered in our Premium alloy NITRALLOY. Boneham NITRALLOY Nitrided Drill Bushings are "case hardened" to a case depth of .013" to Rc 67-69 equivalent. Hardness must be checked by using the 15Kg. Superficial Rockwell Scale. NITRALLOY Nitrided drill bushings demonstrate superior wear resistance and dimensional stability characteristics.
3. Our Sales Service Representatives will be glad to provide you with a quotation on those bushings which have material requirements that are different from our standard materials, ie. M-2 HSS, Stainless Steel, 0-6 Tool Steel, Carbide, Bronze (both sintered and wrought), D-2 Tool Steel.

### BUSHING BODY CHARACTERISTICS

#### Entrance End

The entrance end of each Boneham Drill Bushing has a "blended radius". This permits easier tool entry and assistance in guiding the drill in cases of minor drill/drill bushing misalignment.

#### Counterbores

Any drill bushing with either a "small" bore, or with a "large" drill bushing length-to-bore ratio, is counterbored. This is to provide assistance with lubrication supply to the drill point, as well as expedient removal of chips. Those drill bushings that have standard counterbores are designated with either a • or †.

Please note that all drill bushings with standard counterbores can be supplied without counterbores. Our Sales Service Representatives will be glad to provide you with a quotation as per your requirements.

### Chamfers Leads

All Press Fit Bushings and Liners ground to Press Fit tolerances are supplied with a chamfer and ground concentric lead on the O.D. of the exit end. This chamfer/lead combination provides assistance by "starting" the bushing into the hole, resulting in easier insertion.

### Bushing Bore Tolerances

For Ansi/BMP Standard and Thinwall Bushings for DRILLS

Normal Bushing Bore	Bore Tolerance Over Nominal
from .0135" to .2500"	+ .0001" - +.0004"
over. 2500" to 7500"	+ .0001" - +.0005"
over. 7500" to 1.500"	+ .0002" - +.0006"
over. 1.5000" to 1.8750"	+ .0003" - +.0007"

For ANSI/BMP Standard and Thinwall Bushings for REAMERS

Normal Bushing Bore	Bore Tolerance Over Nominal
from .0135" to .2500"	+ .0005" - +.0008"
over. 2500" to 1.0000"	+ .0006" - +.0010"
over. 1.0000"	+ .0008" - +.0012"

### Concentricity Tolerances

For ANSI/BMP Standard Drill Bushings

Bores up to .5000"	.0003" T.I.R max
Bores over .5000"	.0005" T.I.R max

For Thinwall Drill Bushings

All Bore sizes	.0005" T.I.R max
----------------	------------------

Please note that on Counterbored Drill Bushings, these concentricity specifications apply to the exit end of the bushing.

# Boneham NITRALLOY

A premium quality bushing steel designed to provide extended wear life.

PRODUCTION AND QUALITY  
STANDARDS OF BONEHAM NITRALLOY  
PRODUCTS ARE ASSURED BY  
APPROVAL TO:  
**ISO 9001**  
**EN 29001**  
B55750 PT 1

- **NITRALLOY** is the *name* of an alloy. It is *not* a process.
- We *NITRIDE* **NITRALLOY** from 50 to 80 hours at 9000F to produce a .012" case depth, with a surface hardness of Rc 67-69 equivalent.
- The 32-34 Rc core "softness" of **NITRALLOY** makes it one of the "safest" bushing materials available. Unlike Tungsten Carbide drill bushings, it resists the tendency to shatter due to its tremendous ability to absorb "shock" from heavy "intermittent" cuts, crashes, abuse, or accident.
- **NITRALLOY** can withstand high operating temperatures which can reduce the hardness, effective service life, and dimensional integrity of ordinary steel bushings.
- The excellent "lubricity" and "anti-galling" characteristics of **NITRALLOY** make it the *ideal* bushing material to use with carbide and carbide tipped tooling.
- The wear life of **NITRALLOY** drill bushings can be up to 80% that of Tungsten Carbide drill bushings. It is *not* 80% of the cost of carbide. This makes **NITRALLOY** a cost effective alternative to carbide drill bushings.
- Being that **NITRALLOY** drill bushings demonstrate tremendous wear life characteristics, the opportunity to drastically reduce tooling costs exists. By simply using fewer drill bushings and incurring less machine downtime due to bushing changes, substantial cost savings can be realized.
- Renewable **NITRALLOY** drill bushings are stocked. Press Fit, ISO/Boneham **NITRALLOY**, and Special Design **NITRALLOY** drill bushings are made to your special order Standard Reamer tolerances as well as 86 selected metric bore sizes are available as standards.
- Our Sales Service Representatives are available to provide you with assistance in selecting the appropriate **NITRALLOY** Drill Bushings for your operational requirements.
- To order **NITRALLOY** drill bushings, add the prefix letter "N" to the ANSI/Boneham bushing symbol of the drill bushing you require (example: NSF-32-8, 1/4" I.D.). Please call or fax (toll free) our Sales Service Representatives for a quotation on those bushings you require to be made in **NITRALLOY**.

\* Standard bore sizes available are per chart shown in rear of catalog – including LETTER, NUMBER and FRACTIONAL SIZES.  
 MILLIMETER – from 2.3 mm to 10.5 mm only for selected list designated by ■ on back cover.  
 • COUNTERBORED – with adequate bearing length – can also be supplied without counterbore upon request.  
 † COUNTERBORED – 0.0390 to 0.0469 with adequate bearing length; can also be supplied without counterbore upon request.

# Head Press Fit Bushings

## TO SIZE – ANSI AND BMP STANDARD

WHEN ORDERING STATE: Quantity, Symbol, Bore Size, whether for Drill or Reamer.

- For general info., ordering and technical data, see pages 4-6.
- To order Oversize bushings, suffix symbol with letter "U" (example: H-32-8U)
- To order NITRALLOY Nitrided bushings, prefix symbol with letter "N" (example: NH-32-8).
- NITRALLOY Nitrided drill bushings will be quoted upon request.
- For net prices on Standard Steel bushings, please see price list.
- OUTSIDE DIAMETER FINISH GROUND TO PRESS FIT SIZE.

\* Standard bore sizes available are per chart shown in rear of catalog – including LETTER, NUMBER and FRACTIONAL SIZES.  
 MILLIMETER – from 2.3 mm to 10.5 mm only for selected list designated by ■ on back cover.  
 • COUNTERBORED – with adequate bearing length – can also be supplied without counterbore upon request.  
 † COUNTERBORED – 0.0390 to 0.0469 with adequate bearing length; can also be supplied without counterbore upon request.

**Our Sales Service Representatives are available to assist you in defining the appropriate sizes of the bushings that you require.**

# Slip-Fixed Renewable Combination Bushings

FOR USE AS EITHER TYPE

**THIN WALL**

**WHEN ORDERING STATE:**

Quantity, Symbol, Bore Size, whether for Drill or Reamer.

- For general info., ordering and technical data, see pages 4-6.
- For dimensional data, see page 16
- To order NITRALLOY Nitrided bushings, prefix symbol with letter "N" (example: NSF-TW-36-8).
- NITRALLOY Nitrided drill bushings will be quoted upon request.
- For net prices on Standard Steel bushings, please see price list.
- OUTSIDE DIAMETER FINISH GROUND FOR SLIP FIT INTO LINERS.

### ORDERING INFORMATION

Please supply the following information:

- Bushing **TYPE**
- **OUTSIDE DIAMETER**
- Bushing **LENGTH**
- **INSIDE DIAMETER**
- Whether for a **DRILL** or **REAMER**

The bushings in this section of the catalog are defined by the ISO Symbol System. This system is applied as follows:

#### Example Number 1:

A Headless Press Fit bushing with a 10mm OD., a length of 16mm, a bore of 6mm, and to be used for drilling, would be described as:

PP10F, 6.00mm, DRILL

### BUSHING TYPE DESIGNATION

<u>Bushing Type</u>	<u>ISO Letter Designation</u>
Headless Press Fit	PP
Head Press Fit	PH
Slip-Fixed Renewable	RD
Headless Liner	LP
Head Type Liner	LH

### LENGTH SYMBOLS

The ISO Length Designation System incorporates the use of "Letters" for specific standard bushing lengths. Each Boneham Metric drill bushing has three standard lengths as indicated in the identification charts. Standard ISO length symbols/lengths are as follows:

Length	Symbol	Length	Symbol	Length	Symbol
6mm	A	25mm	J	56mm	S
8mm	B	28mm	K	67mm	T
9mm	C	30mm	L	78mm	W
10mm	D	35mm	M	89mm	X
12mm	E	36mm	N	105mm	Y
16mm	F	40mm	P	112mm	Z
20mm	H	45mm	R		

The LENGTH of a Metric Drill Bushing is considered to be overall for headless press fit, all liner bushings, and head press fit, and the "under head" length for all renewable bushings.

### STANDARD INCREMENT BORE SIZES

Metric Drill Bushings are manufactured with standard incremental bore sizes. The following chart outlines these standard increments:

Bore Size Range	Bore Size Increments
From 1.0mm to 3mm	0.05mm
Over 3mm to 14mm	0.1mm, and all 0.25mm and 0.75mm bore sizes
Over 14mm to 33mm	0.25mm
Over 33mm to 51mm	0.5mm
Over 51mm to 100mm	1.0mm

Any bore size that does not fall within the above standard range listings will be considered to be special. Our Sales Service Representatives will be glad to supply you with the appropriate pricing for all specials.

Metric Drill Bushings with bore sizes above 48mm are not stock items, and will be manufactured against customer's order.

### Prices

Each ISO/Boneham style bushing has a "Bushing Reference" number. These reference numbers are located in the identification charts on the following pages.

Please note that all prices may be subject to change without prior notice.

### Special Bushings

When required dimensions vary from the standard catalog listings of ID., O.D., Length, or Tolerance, the bushings are considered to be "specials". Many specials can be made from standard cataloged items by minor alterations. Others can be manufactured from standard bushing blanks. Some items are so completely different they must be custom made. Boneham is ready to manufacture all Metric specials required - from the minor alteration to the complete from "scratch" special. Please forward your specifications, whether verbal, by sketch, or blueprint, along with your material requirements, to our Sales Service Representatives for expeditious review and quotation.

As always, please use our **TOLL FREE TELEPHONE** or FAX numbers:

800 Telephone: 1-800-631-7852  
800 Fax: 1-800-526-9494

### METRIC BUSHING MATERIALS

1. Boneham Metric Drill Bushings are manufactured from steel which demonstrates excellent wear resistance and dimensional stability characteristics. This material is hardened to Rc 62-64.
2. All Boneham Metric Drill Bushings (1.6mm bore and over), are offered in our Premium alloy NITRALLOY. Boneham NITRALLOY Nitrided Drill Bushings are case "hardened" to a case depth of .013" to Rc 67-69 equivalent. Hardness must be checked by using the 15Kg. Superficial Rockwell Scale. NITRALLOY Nitrided drill bushings demonstrate superior wear resistance and dimensional stability characteristics. Our Sales Service Representatives will be glad to provide you with a quotation on those Metric Drill Bushings required in NITRALLOY.

### BUSHING BODY CHARACTERISTICS

#### Entrance End

The entrance end of each ISO/Boneham Metric Drill Bushing has an internal chamfer. This "angle", which is closely matched to the angle of a drill point, permits easier tool entry and assistance in guiding the drill in cases of minor drill/drill bushing misalignment.

#### Chamfers/Leads

All Metric Press Fit Bushings and Liners ground to Press Fit tolerances are supplied with a chamfer and ground concentric lead on the O.D. of the exit end. This chamfer/lead combination provides assistance by "starting" the bushing into the hole, resulting in easier insertion.

#### Bushing Bore Tolerances

Bore limits for ISO/Boneham Standard Drill Bushings for DRILLS and REAMERS

ISO Bore Tolerances (mm)					
Normal Bore Sizes (mm)		Limits for Bores of Drill Bushings (F7 Hole)		Limits for Bores of Reamer Bushings	
Over	Up to	High+	Low+	High+	Low+
-	3	.016	.006	.018	.011
3	6	.022	.010	.023	.015
6	10	.028	.013	.027	.018
10	18	.034	.016	.031	.021
18	30	.041	.020	.038	.025
30	50	.050	.025	.046	.030
50	80	.060	.030	-	-
80	120	.071	.036	-	-

### Bushing O.D. Tolerances

O.D. limits for ISO/Boneham Standard Drill Bushings for Press Fit Bushings and Liners, and Renewable Bushings

ISO O.D. Bore Tolerances (mm)					
Normal O.D. Sizes (mm)		O.D. Limits for Press Fit Bushings (n6)		O.D. Limits for Renewable Bushings (m6)	
Over	Up to	High+	Low+	High+	Low+
-	3	.010	.004	.008	.002
3	6	.016	0.08	.012	.004
6	10	.019	0.10	.015	.006
10	18	.023	.012	.018	.007
18	30	.028	.015	.021	.008
30	50	.033	.017	.025	.009
50	80	.039	.020	.030	.011
80	120	.045	.023	.035	.013

### Concentricity Tolerances

For ISO/Boneham Standard Drill Bushings	
Bores up to 16mm	0.008mm T.I.R max
over 16mm to 48mm	0.012mm T.I.R max
over 48mm	0.04mm T.I.R max

### Counterbores

All of the standard Boneham metric drill bushings listed in this catalog are manufactured without counterbores. Our Sales Service Representatives will be glad to provide you with a quotation should you require metric drill bushings that are counterbored. Please note that if counterbored bushings are required, the concentricity tolerances outlined above apply to the exit end of the bushing.

### LOCKING SCREW THREAD TOLERANCES

The screw threads on all Metric locking screws are manufactured to class 6g tolerances.
